

Executive Overview

Governed IT Change That Delivers Business Confidence

Bushey IT Change helps senior leaders deliver complex IT change with certainty.

We specialise in high-risk migrations, integrations, separations, and transformation programmes where delivery failure creates material operational, financial, or reputational exposure.

Backed by **30+ years of delivery leadership**, a deep **financial-services pedigree**, and **runbooks, rollback plans, and risk registers baked in from day one**, we bring structure, pace, and control to IT change that matters.

The Problems We Solve

Most major IT initiatives don't fail because of technology.

They fail because **risk is surfaced too late**, **governance is reactive**, and **delivery confidence erodes** before leaders have clear choices.

Boards and executives are left asking:

- *What could go wrong and how exposed are we?*
- *Are we getting early warning signals or late surprises?*
- *Do we have credible contingency and rollback plans?*
- *Is this change being adopted, not just delivered?*

Bushey exists to answer those questions **early, clearly, and continuously**.

How We Create Confidence

We treat IT change as a **controlled system**, not a heroic effort.

Our delivery model hard-wires:

- **Board-ready governance cadence**
- **Proactive risk identification and mitigation**
- **Clear accountability and decision flow**
- **Operational readiness, not just technical completion**

Every engagement includes:

- Structured discovery and risk surfacing
- Delivery runbooks and rollback planning
- Risk registers actively managed not shelfware
- Transparent reporting aligned to executive decision-making

Executive Overview

Where Leaders Use Bushey

We are typically engaged when **the cost of failure is high**, including:

- Enterprise cloud, application, and Data Centre migrations
- M&A technology integration and separation (Day-1 readiness)
- Portfolio recovery and delivery stabilisation
- Regulatory, security, and infrastructure modernisation programmes

Our experience is strongest in **financial services and regulated environments**, where governance and operational continuity are non-negotiable.

What Executives Gain

- **Predictable delivery** - fewer surprises, earlier decisions
- **Controlled risk exposure** - issues surfaced while they are still manageable
- **Board confidence** - clear, defensible reporting and assurance
- **Faster time to value** - reduced rework and delivery friction
- **Operational continuity** - change that lands cleanly into BAU

Why Choose Bushey

- **30+ years of hands-on delivery leadership**
- **Financial services delivery pedigree**
- **Governance, runbooks, rollback and risk controls embedded not bolted on**
- **Practical, accountable delivery teams not slideware**
- **Fixed-scope, structured engagements designed for executive clarity**
